NATE Contractors

High Efficiency Central Air Conditioning Rebate—up to \$550

To encourage cost effective energy reduction through the use of central air conditioners that are more efficient than those currently required by Florida Energy Efficiency Code for Buildings. Valid on units 5 tons or smaller. Must have a Seasonal Energy Efficiency Ratio (SEER) of 15 or greater and an HSPF (Heating Season Performance Factor) of 8.2. Must be ENERGY STAR qualified. Manual J Calculation, copy of receipt of purchase and ARI Certification of Performance are required. Must be purchased and installed by a GRU Partnering Contractor who is a State of Florida Certified Heating, Air Conditioning, Refrigeration and Ventilation (HARV) or mechanical contractor.

\$300—Standard 15 SEER or greater

\$550—Super SEER Air Conditioners that are equipped with variable speed or multi-stage compressors (15 SEER or greater).

Restrictions—Limit three rebates per location

ENERGY STAR® HEATING & COOLING REBATE - CENTRAL AIR CONDITIONER APPLICATION FORM

City Utilities electric residential, multi-family and residential new construction customers who purchase and install a high efficiency central air conditioning system may qualify for a rebate of \$100 per Ton and \$25 for each additional Seasonal Energy Efficiency Ratio (SEER) above 14. Nearly 50% of a home's energy consumption is attributed to heating and cooling. So making wise decisions about your home's Heating, Ventilation, and Air Conditioning (HVAC) systems can have a big effect on your comfort level and utility usage. For this reason, City Utilities is offering a rebate to help make this energy efficient decision more affordable. *Certain restrictions apply; see Guidelines.*

Rebate Process:

1. Select an HVAC contractor who is qualified to perform a Manual J load calculation.
 - City Utilities recommends getting at least 2-3 different bids. For information on how to select a qualified contractor, or to view the City Utilities Heating & Cooling Contractor List, visit www.cuenergywise.com.
 - A Manual J load calculation must be completed before the installation of the new system.
2. Complete the system installation.
3. Submit the following information:
 - Application with the customer and HVAC contractor's signature.
 - Copies of the invoice showing the date of installation.
 - Manual J load calculation summary report
 - ARI Certificate
4. The rebate will be processed within 3-5 weeks after the property submitted application and information is received.
